

Design Steps

- Step 1 - Assess your organisation's needs
- Step 2 - Determine level of visual security needed
- Step 3 - Determine your organisation's technology card needs
- Step 4 - Determine your badge orientation & layout
- Step 5 - Card size, format and artwork
- Step 6 - Taking photos for use on your ID card

See our Design Guide for more information

About nXient

nXient provides a complete range of Identity Management solutions including our ID Concierge cloud-based ID platform.

ID Concierge allows users to create and manage their photo IDs, access control and logical access credentials on an easy to use secure platform.

With secure in-house bureau service capabilities for credential issuance, personalisation and fulfilment services for the consumer, government and corporate customer, nXient offers clients ID systems management, hardware and engineering services as well as full implementation and program management.

Our design service is here to assist

Need ID Badges ?

We deliver great looking, secure, ID cards - Quickly.

ID Concierge - ID Badges within 24 hrs

nXient's Identity as a Service Suite (IDaaS) provides a cloud-based platform to centralize and automate the process of establishing, capturing, securing, printing, and distributing your organisation's ID credentials.

You no longer have the hassle or expense of purchasing and maintaining expensive equipment that you may only use once a year. ID Concierge and our suite of Identity Services reduce time, effort, and cost when deploying secure, trusted ID Credentials.

nXient provides a secure print and bureau service for ID credential production, along with encoding of physical and logical access programming. This service provides the latest secure technologies, and allows your security department to manage security- not ID Badge production.

Controlled Access

Your ID credential can be used to provide extended capabilities to any access control system, while ensuring the highest level of security that's built into the DNA of the verified identity. Protect and enhance your access control system by only using verified identities from nXient.

We make it easy

Using nXient's ID Concierge, there is no graphic design department necessary, no expensive equipment to purchase, and no minimum print quantity! You receive access to our complete range of professionally designed card templates, and can even consult with our nXientCare team about the types of cards and technology best suited to the needs of your program.

Using nXient's ID Concierge service, customers can use their existing branding and designs, or can choose any of our professionally designed card templates.

Visual Identity

Corporate visual identity plays a significant role in the way an organization presents itself to both internal and external stakeholders. In general terms, a corporate visual identity expresses the values and ambitions of an organisation, its business, and its characteristics.

ID Verify

Using our ID Secure technology provides an immutable identity for your employees, students or items such as exam papers, certificates, or valuable goods. ID Verify instantly verifies identities, authenticity, and currency.
